LETTER OF INTENT

Nov 18, 2025

To: xxxxxx

Dear Sirs,

Subject: xxxxxxxxxxxxxxxxxxxxxxxx.

In response to the Request for bid invitation, we, **Liberia Renaissance Group, Liberia**, are pleased to submit our Expression of Interest (EOI) for the consultancy services for the above-captioned project.

Liberia Renaissance Group, Liberia, is a certified multidisciplinary engineering consultancy firm, providing comprehensive expertise across all stages of project development. Established in 2014, LRG has expanded its operations across Liberia, emerging as a preferred consultant and significant stakeholder in the infrastructure development of these regions. Our firm has built a solid reputation among clients and is actively involved in projects funded by Liberia and International/National Partners and the leading multilateral funding agencies.

Our areas of specialization include, but are not limited to, Highways & Roads, Bridges & Structures, Traffic & Transportation, Socio-Economic & Environmental Impact Assessment, Water Resources Development & Management, and Rural, Urban Regional Infrastructure Development.

With over 9 years of experience in infrastructure development projects, LRG has successfully completed several projects financed major funding agencies.

Given our technical and management capabilities, along with our extensive experience in executing similar projects in the developing countries, we are confident in our ability to deliver the captioned assignment to your full satisfaction.

The Proof of Certification of Incorporation/Registration Certificates, Company Profile and Statement of turnover duly certified by the agency are attached. The proven track-record can be verified from the Project Data Sheets attached along with Client testimonials.

We look forward to being shortlisted, so that we could submit a detailed proposal, addressing comprehensively all the project related issues, in conformity with stipulations of the TOR. We will be pleased to provide any additional information with regard to our Expression of Interest, if required.

Thanking you and assuring you of our highest consideration.

Yours truly,

Name and Title of Authorized Signatory:

G. Delino Bryant, Sr
Chief Executive Officer

LEGAL DOCUMENTS

11.18.2025

To, **xxxxxxxx**

Dear Sirs,

Power of Attorney/Authorization

Subject: **xxxxxxxxxxxxxxxxxxxxxx**.

I, G. Delino Bryant, Sr, Chief Executive of Liberia Renaissance Group (hereinafter referred to as “LRG”) with the office at:

LIBERIA RENAISSANCE GROUP (LRG)
Bakar Compound, 1st Floor Apt. B5, Sinkor, 9th Street
Monrovia, Liberia

Email: construct.liberia@gmail.com

hereby state that, by the power vested in me by the Government of Liberia, State of Montserrado as the CEO of LRG, I hold the power to act as an authorized signatory to deal, negotiate, sign, execute any contracts, agreements on behalf of the company and also to do all such acts and things as may be deemed necessary and incidental hereto and authorized to delegate the powers of authorized signatory to the Employee of the Company / any representative of Joint-venture / Associate Partners, to deal all such matter on a project specific basis as needed”.

The copies of the certificate of Signature Attestation (original in English) issued by the City Monrovia of the State Montserrado and copy of its English translation are attached herewith.

Yours truly,

G.Delino Bryant, Sr
Chief Executive Officer
For Liberia Renaissance Group-LRG

Certificate of Incorporation

CORE BUSINESS AND YEARS IN BUSINESS

CORE BUSINESS AND YEARS IN BUSINESS

Background:

Established in 2014, LRG) is a premier multidisciplinary engineering consulting firm delivering comprehensive expertise across all stages of project development. Operating extensively throughout Liberia, LRG has become a trusted partner and key player in infrastructure development across these regions.

LRG has earned recognition and credibility for its work on projects financed by leading international funding agencies. The firm is registered with and actively participates in projects funded by the Government of Liberia, World Bank, United State of America Government-MCC, European Union and Private Individuals.

Our continued success is driven by our highly qualified architects, engineers, and support staff, who manage a wide array of projects with skill and dedication. In addition to our in-house team, LRG maintains a vast global network of professionals - including specialists, engineers, architects, and planners - who provide targeted expertise in project design, supervision, project management, economic analysis, technical and financial feasibility, planning, and management consultancy services.

Areas of Expertise:

LRG specializes in the transport sector, particularly in planning, detailed design, and supervision of roads, bridges, and airport projects. Our multidisciplinary teams bring extensive experience to each project, ensuring challenges are addressed from both the client and contractor perspectives. We remain steadfast in our commitment to excellence through the effective integration of expertise, technology, and equipment, with a track record of delivering quality results within schedule.

Core service areas include:

- Techno-economic feasibility studies
- Basic and detailed design & construction supervision
- Environmental and social impact assessments
- Project report preparation
- Master planning
- Administrative and management consultancy
- Preparation and evaluation of tender documents

- Architectural Design
- Economic and Engineering Analysis
- Geotechnical Investigation
- Highway Management & Maintenance
- Landscaping
- Pavement Planning
- Procurement
- Quality Management
- Rural Development
- Socio-Economic Studies
- Training & Technical Assistance
- Urban Development
- Water & Wastewater

Scope of Services:

Road and Civil Engineering (Design & Supervision)

- **Pre-Project Planning:**
 - Feasibility and traffic studies
 - Environmental and social impact assessments
 - Cost-benefit analysis
- *Project Support:*
 - Surveying
 - Materials testing
 - Community consultation

- Pavement assessments and management systems
- *Design & Documentation:*
 - Basic planning and detailed design
 - Tender preparation and evaluation
- *Construction Implementation:*
 - Conventional and labor-intensive construction management
 - Materials inspection and testing
 - Contract administration and supervision
 - Maintenance management
 - Rehabilitation

Township Infrastructure

- Residential infrastructure and layout planning
- Community engagement and consultation
- Service identification and design
- Budget planning and cost control
- Contract administration
- Construction supervision
- Environmental and social impact studies

Building Construction

- Material and foundation design
- Single and multi-storey structures
- Design and supervision of structural timber, concrete, and steel buildings

- Earth-retaining structures
- Environmental and social impact studies

Bridges

- Preliminary and detailed design, including hydraulic and structural analysis
- Design for culverts and bridges (metal, box, concrete, steel)
- Tender documentation and evaluation
- Construction supervision and quality control
- Post-construction maintenance and rehabilitation
- Environmental and social impact assessments
- Design and supervision of water supply, treatment, and storage systems
- Large-scale sewage treatment plant design
- Construction supervision and quality control
- Maintenance and rehabilitation
- Environmental and social impact assessments

TECHNICAL CAPABILITY

Introduction

LRG is a multi-disciplinary firm of international consultants with over 10 years of experience in providing comprehensive professional services for infrastructure development including highways, bridges, airports, road safety, environmental and social impact studies, etc. LRG is a leading consultancy organization in the transport sector and has successfully undertaken several

prestigious consultancy assignments under International Competitive Bidding and National Competitive conditions of contract in several country in Liberia, satisfaction of the clients and the international funding agencies.

LRG is empanelled and has worked with major international funding institutions like the Millennium Challenge Corporation-MCC/ BAH USA Fund for United Department of Transportation, World Bank funded Project for Monrovia City Corporation Access Road Project.

Strength

Detailed Engineering Design

LRG has carried out strategic options studies, pre-feasibility studies, feasibility studies, preliminary and detailed engineering design and drawings, technical advisory and audit services, road safety, pavement management system, socio-economic studies, Environmental Impact Assessment (EIA), Social Impact Assessment (SIA), cost estimates and tender documents of Expressways, Highways & Rural Roads, etc. in various countries.

Construction Supervision

LRG has successfully rendered project management and construction supervision, including design review of several important Expressways, Highways and Roads. While undertaking construction supervision projects, our engineers have carried out the role and responsibilities as Engineer or Engineer's Representative and exercised full quality control over construction materials and various phases of construction as part of the Quality Assurance Programmes formulated for various projects.

Bridges

LRG has carried out detailed design of several Bridges / Structures by using internationally renowned software like STAAD PRO, GTSTRUDL and ADAPT have also been used wherever required.

Road Safety

Implementation of road safety programme has been an important component for most of our projects. The same also included improvement of public awareness on road traffic safety by supporting and advising the local road authorities on a systematic approach for planning, design and co-ordination, implementation of accident reporting system, public training, general awareness on traffic

signs/signals, seminars on road safety, technical assistance and support in the field of road management and road traffic safety, through capacity building and enhancement. In this regard LRG has also developed suitable Road Safety Awareness Programmes.

Traffic and Transportation Studies

Traffic and transportation studies form an integral part of all our highway and bridge projects preparation. Extensive traffic and transportation studies are carried out to determine the geometric profile of highways and bridges, the requirements for bypasses including widening, strengthening and the layout of intersections as well as the impact of industry, agriculture, tourism and social activities on transport demands. Traffic and transportation studies have also been carried out to demonstrate the key findings about the existing road network systems so that the authorities concerned could fix priorities for improvement of roads. Our company has adequate experience in carrying out traffic volume counts, peak hour traffic surveys, origin and destination studies, axle load surveys, speed delay studies, traffic circulation pattern studies, studies of generated traffic from industry, agriculture, tourism and social activities, economic evaluation. Traffic forecasts and assignments of traffic on various road sections are carried out scientifically to enable the proper planning of highway and bridge projects. The economic evaluation of projects is carried out on the basis of projected traffic, taking into account the growth of the region.

Tender Assistance

LRG has got expertise and vast experience in the field of preparation of contract packages and implementation schedule, preparation of pre-qualification documents, providing assistance towards pre-qualification, preparation of tender documents, review and evaluation of pre-qualification submissions for client's approval, carrying out evaluation of tenders for the projects and assisting the Clients in negotiation with the tenderers leading to the award of work, including preparation and finalization of contract agreements with the contractors.

Environmental / Social Impact Studies

LRG has successfully carried out a number of Infrastructure Projects, wherein Environment Impact Assessment (EIA) and Environment Management Plan (EMP) studies have been carried out. LRG has extensive and rich experience in the field of monitoring, evaluation / impact studies, including Social Impact Assessment (SIA), Resettlement and Rehabilitation (R&R) planning, organizational needs for resettlement works, compensation for land acquisition, assessing economic satisfaction of resettlers, poverty alleviation studies and gender studies.

Availability of Experienced Personnel

LRG employs experienced professionals of various disciplines on our assignments in different countries.

ORGANIZATIONAL APPROACH

General, strategic and political approach of Consultant

The approach of the organization and of the coordination for this project is based on the experience of the Consultant acquired under the management of similar projects. This experience led to the recognition that success depends on careful planning from the beginning of the project, the various tasks as well as the detailed definition of a specific organization combining teams from the best, using the latest technics available.

The Consultant is used to develop multidisciplinary teams to carry out the Design Review, Road Safety Assessment/Audit, Monitoring and Supervision of Road works with a consistent standard of quality and efficiency.

Specifically for this project, the Consultant offers a team carefully selected and composed of an optimal mix of staff complying with the required disciplines.

Moreover, in order to meet the dual challenge of quality and competitiveness, the Consultant has powerful computers for the physical and budgetary planning, design, modelling.

Firm support team

The Consultant will engage, if necessary, a technical support team at the firm to provide the Head of mission and the project team support, advice and recommendations that may be required on certain technical aspects of the project. This support team will cover all disciplines of the mission. It will also ensure the tasks of reviewing and verifying reports and some key technical services.

This support will be provided by a team of engineers chosen for their deep knowledge of this type of project or specialization recognized on a specific topic.

Local staff integration

The integration of local staff and contractors in the mission team is one of the important points for collaboration and smooth progress of the services. They will, as for the rest of the consultant staff, task to achieve under the supervision and control of the mission leader and consultant specialists.

The tasks and responsibilities will be defined at the establishment of the Project Management Plan to be established by the project manager at the beginning of the services.

Master of planning

From the start of the mission, the Head of mission will be responsible for establishing a detailed schedule showing different tasks managers, times, critical path and production dates of various reports and documents.

It will determine the critical tasks involved in the process progress and will pay particular attention to monitoring their implementation. This schedule will be updated regularly and followed in order to anticipate the possible slippage could jeopardize the planned deadlines for different tasks. In this case, the necessary measures (Intervention of the support team, team building, etc.) will be taken to ensure compliance with the deadlines forward.

Master of quality

The major objective of the consultant is to provide services in response to the Client in all respects with the requirements specified in the contract.

Quality Engineering is ensured through effective interaction between the professional competence of staff, the technical means at its disposal, the experience and the ability to access the most complete information, combined with the ability to implement all these resources.

The most important resource is represented by the staff. The quality is first achieved through the commitment and motivation of competent staff, whose qualification is maintained and developed constantly.

PROFILE

LRG, a multidisciplinary engineering construction and Consultant Firm dedicated to bring clarity and quality – driven technical expertise to client to achieve the goals.

ABOUT US:

Is a certified leading multidisciplinary engineering construction and Consultant Firm provides its expertise any time project development. Established in 2014, LRG operates in Liberia and have partner with international firms and local in executing projects. LRG has established creditability amongst their clients on the projects funded by all multilateral and national findings agencies.

Our competitive achievements are always honored through our talented qualified architects engineers and support staffs who handled a broad range of projects.
